Event title: 3-Day TRIZ Workshop with Certification test

When: Jan, 2013 - Jan 10, 2013

Begins at: 08:30 AM - 05:00

Where: Technical Innovation Center - Worcester, MA, USA

Category: Training

Prerequisite: Some basic knowledge of TRIZ Methodology

Event Description: This 3 day Workshop will provide participant with a good grasp of TRIZ methodology and prepare participant for the Associate Certification exam from Altshuller Institute.

Topics for discussion and review will include: Ideality, Levels of Innovation, Evolution of Systems, Contradictions and the methods to resolve them, Su-Field Analysis, Standards and ARIZ.

This compact and intense Workshop should adequately prepare participants to pass the Associate level certification test which will be administered following the Workshop.

For more information about availability and costs contact Technical Innovation Center at tic@triz.org or 508-799-6700.

Training Location: Worcester, MA, USA

In this book, "**TRIZ Technology for Innovation**", Isak Bukhman, TRIZ Master, provides insight into the TRIZ Methodology. The structure of the book with its examples, descriptions and colored graphics give the reader keen insight on how to apply TRIZ to solve problems.

TRIZ Principles for Information Technology was written by Umakant Mishra, holder of numerous advanced degrees and certifications in Philosophy, Business and Information Technology. He co-founded CREAM Information Technologies Pvt. Ltd. in 2000 (Bangalore, India). He served as Director and Chief Technology Officer until his separation in 2004. He has analyzed over 1,000 IT patents, written over 100 articles on TRIZ and IT. He also developed various TRIZ software, and created and maintains a TRIZ website, www.trizsite.com.
